TC 1700

Please amend claim 7 as follows:

7. (Twice Amended) A method for bleaching medium consistency cellulose pulp comprising the steps of providing a stream of said cellulose pulp, generating a stream of ozone-containing gas consisting essentially of a carrier and ozone at a concentration of at least 20% by weight, and radially injecting said stream of ozone-containing gas into said stream of cellulose pulp so as to provide a stream of bleached cellulose pulp without using a high-shear mixer during said steps.
